Skill

- NodeJS
- ExpressJS
- RestAPI
- MongoDB
- MySQL
- Git
- PM2
- HTML
- CSS
- JavaScript
- React.js
- Figma
- Firebase

Soft Skill

- Commitment and Hard working
- Positive Attitude
- Fixed Intension, Dedication
- Responsible and Punctuality

Education Background

- Bachelor of Computer Applications (BCA), completed in 2023 with a CGPA of 6.6 from MAHGU University.
- Intermediate (12th Grade) with 65.2% from UP Board
- High School (10th Grade) with 68.6% from UP Board

Professional Summary

MERN Stack Developer with 2 years of experience building dynamic, scalable web applications using Node.js, Express.js, React.js, and MongoDB. Proficient in creating REST APIs, integrating third-party services (like Zoho Books and Firebase), and implementing secure authentication mechanisms using JWT. Passionate about delivering clean code and solving real-world problems through full-stack development.

Professional Experience

Briti Enterprise Software Technologies | Software Development Engg

09/2024- Present

- Experience in developing REST APIs using Node.js for backend services and building dynamic user interfaces with React.
- Skilled in HTML, CSS, JavaScript, React.js, Git, Figma, and Firebase.
- Developing full-stack procurement solutions in PROCURE.QA (<http://65.2.0.34:3000>, :4001), including supplier and product management.
- Built secure login/signup flows using JWT.
- Worked on Excel validations, role-based access control, and dynamic data filtering.
- Collaborated closely with the frontend team to develop reusable React components and UI enhancements.
- Contributed to the "Madad" website, a social help portal built with HTML, CSS, and JavaScript, deployed on Firebase.

Srikari Impetus Solution Pvt. Ltd. | Associate Software Engg

05/2023- 08/2024

- Experienced Node.js Developer with strong expertise in building and maintaining RESTful APIs using Node.js and Express.js.
- Proficient in databases like MongoDB and MySQL, with hands-on experience in data modeling and querying.
- Skilled in developing and managing server-side components and implementing scalable backend logic.
- Known for writing clean, modular, and reusable code that follows industry best practices.
- Strong analytical and problem-solving abilities, with a focus on performance tuning and debugging.

Projects

1. PROCURE.QA – P2P Automation Platform

Full-Stack Developer

09/2024 – Present

Live Link: <http://65.2.0.34:3000>, 4001

- Developed PROCURE.QA, a procurement platform, implementing key features like supplier/product CRUD APIs, search functionalities, and Excel file validations.
- Designed and implemented user authentication with secure signup/login APIs using JWT for enhanced security.
- Built workflows, diagrams, and documentation for procurement modules (e.g., RFQ, PO, PR).
- Created and deployed projects like Madad and translated web pages using Google Translate API.
- Integrated tools like Zoho Books for customer/vendor data management and performed CRUD operations.

Key responsibilities:

- Supplier/product CRUD APIs and global search functionalities.
- File validation for Excel uploads with error handling for missing/duplicate rows.
- APIs for user registration/login, client management, and advanced order handling.
- Implemented user authentication using secure techniques like JWT integration.

2. Hyderabad Water Board (HMWSSB)

Node.js Developer

05/2023 – 08/2024

- HMWSSB is the Water Utility Services Board that provides water supply and sewerage services to the entire Hyderabad Metropolitan area and some surrounding municipalities and villages.

Key responsibilities:

- Developing web services using Node.js and testing web services using Postman.
- Created APIs using Node.js and sequelize.
- Worked on the MCC (Metro Customer Care) screen. Created sample screen layouts based on current forms.
- Created screens such as Driver Daily Duty Report, Open Cash Counter, and Morning Report.
